### **HOW TO PROMOTE SEPARATE COLLECTION OF BIOWASTE: KEY DATA FROM THE ITALIAN COMPOSTING ASSOCIATION**

The Italian experience is very relevant at European level in terms of effectiveness and diffusion of the separate collection of Biowaste, and especially of food waste separated from garden waste. It now allows to collect more than 6 million tons of Biowaste, with 308 plants in operation and 1.8 million tons of high quality compost generated.

The Italian composting association guarantees the certification of all the chain, from the collection to the final product.
